- Strong Analytical And Problem-solving Skills
- Create Dynamic Dashboard and analysis Skill

technical Project

HR-Toolkit

The "HR Toolkit" is an all-in-one system that simplifies HR tasks. It uses face recognition for attendance and helps HR manage attendance effortlessly. An employee chatbot enhances communication and gives solutions. The shared to-do list keeps everyone organized. The higher authority will assign their work to a To-Do List.

BUILDING CONFIDENCE & TECHNIQUES FOR IMPROMPTU SPEECHES

Regular Practice

I dedicate 2 hours daily to practical work and 1 hour to theory, supplemented by watching videos and practicing to build confidence.

Seek Feedback

I complete tasks, projects, and assignments assigned by faculty and actively seek feedback on my work quality, confidence, speech, and communication skills.

Set Achievable Goals

My goal is to complete my data analysis course and secure a job at a top company with a salary that meets my expectations.

Positive Mindset

I maintain a positive mindset to continuously enhance my confidence.
